EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Regarding claim 12, in line 15, "noise-removed" has been changed to -- noise-removed --.

Regarding claim 17, in line 14, "noise-removed" has been changed to -- noise-removed --.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

2. Regarding claim 1, claim is directed to an OFDM apparatus for receiving and demodulating an OFDM signal. The apparatus comprises uniquely distinct features "a channel estimation section for calculating a channel response before interpolation by performing computation between a frequency-domain OFDM signal obtained by Fourier-transforming the received OFDM signal and the pilot signal, performing

interpolation with respect to the before-interpolation channel response using a plurality of filters having different characteristics from each other, and outputting a plurality of interpolated channel responses based on respective results of the interpolation obtained by the plurality of filters". The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

3. Regarding claim 7, claim is directed to an OFDM reception apparatus for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known, the apparatus comprising a combination of uniquely distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

4. Regarding claim 10, claim is directed to an OFDM reception apparatus for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known, the apparatus comprising a combination of uniquely distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an

OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

5. Regarding claim 12, claim is directed to an OFDM reception apparatus for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known, the apparatus comprising a combination of uniquely distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

6. Regarding claim 14, claim is directed to an OFDM reception method for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known. The method comprises uniquely distinct features "a channel estimation step for calculating a channel response before interpolation by performing computation between a frequency-domain OFDM signal obtained by Fourier-transforming the received OFDM signal and the pilot signal, performing interpolation with respect to the before-interpolation channel response using a plurality of filters having different characteristics from each other, and obtaining a plurality of interpolated channel responses based on respective results of the interpolation obtained by the plurality of filters". The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM

signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

7. Regarding claim 15, claim is directed to an OFDM reception method for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known. The method comprises a combination of uniquely distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

8. Regarding claim 16, claim is directed to an OFDM reception method for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known. The method comprises a combination of uniquely distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

9. Regarding claim 17, claim is directed to an OFDM reception method for receiving and demodulating an OFDM signal which transmits a pilot signal whose amplitude and phase are known. The method comprises a combination of uniquely

distinct features as set forth in the pending claim. The closest prior art of record, Hayashi et al. US Patent 7,436,759 B2 disclosing a reception apparatus for receiving an OFDM signal having a plurality of pilot carriers, either singularly or in combination, cannot teach or suggest the uniquely distinct features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
